DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 8-24 are rejected under the judicially created doctrine of non-obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6,651,410. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim equine hoof-wear in combination comprising a sole having a base circumscribed by a peripheral wall defining a receiving area, amid-sole received within the receiving area, a removable insert, and an interlocking means integrally formed with the mid-sole and with the removable insert interlocking the two together such that the removable insert can be inserted and removed and replaced with a different insert for treating different ailments.
